Prediction of Protein Secondary Structure | SpringerLink Written for the highly successful Methods in Molecular Biology ... Prediction of Protein Secondary Structure serves as a vital guide to numerous state-of-the-art. Protein structure prediction - Wikipedia Protein structure prediction is the inference of the three-dimensional structure of a protein from its amino acid sequence—that is, the prediction of its folding. Protein secondary structure - Wikipedia Protein secondary structure is the three dimensional form of local segments of proteins. The two most common secondary structural elements are alpha helices and beta.
